SUMMARY

Army veteran turned software developer with a genuine love for learning. Researched coding languages and taught myself Python before enrolling in a full stack coding bootcamp. Excited to leverage my leadership and technical skills in a full stack software engineering role where I can deliver high impact customer features.

SKILLS

FRAMEWORKS: Django

LANGUAGES: Python, Javascript, HTML, CSS, BASH

TOOLS: GitHub, React, Selenium, Grub, Syslinux

DATABASES: PostgreSQL, SQLite

PROJECTS

Stock and forex quote API

Built an application to check the price of stocks and foreign exchange. You can type in the name of the stock symbol and get an immediate stock price. Uses an API for forex and stock quotes.

EDUCATION

Code Platoon

Jan. 2020 - Apr. 2020

- Studied Python, Javascript, PostgreSQL, AWS
- Practiced agile, project management, best engineering practices
- Trained on multiple frameworks with lots of pair programming

California State University Northridge

Sept. 2014 - Nov. 2016
